HEALTHY FORESTS RESERVE PROGRAM (HFRP)

Program Description

The USDA Natural Resources Conservation Service's [Healthy Forests Reserve Program \(HFRP\)](#) helps landowners restore, enhance, and protect forestland resources on private lands through easements and financial assistance. HFRP aids the recovery of endangered and threatened species under the *Endangered Species Act*, improves plant and animal biodiversity, and enhances carbon sequestration.

Climate Highlights

HFRP provides 10-year forest restoration agreements and 30-year forest conservation easements—which are legal agreements limiting the uses of land. One of the primary objectives of the HFRP is to “enhance carbon sequestration,” which mitigates climate change. At the end of fiscal year (FY) 2021, over [678,000 acres](#) were enrolled in the program.

Funding

Discretionary funding for HFRP was previously authorized at \$12 million annually through FY 2023. Congress appropriated \$7 million for HFRP in FY 2023 but did not fund the program in FY 2024.

Legislative Side-By-Side

The following Side-by-Side compares the House and Senate versions of the Farm Bill’s HFRP with current law. Underlined text indicates suggested additions to current law. Struck text indicates suggested deletions to current law. “No change” indicates that the entire section was left unaltered.

The Environmental and Energy Study Institute (EESI) is a non-profit organization founded in 1984 on a bipartisan basis by members of Congress to help educate and inform policymakers, their staff, stakeholders, and the American public about the benefits of a low-emissions economy that prioritizes energy efficiency, renewable energy, and new clean energy technologies. In 1988, EESI declared that addressing climate change is a moral imperative, which has since guided our work toward our vision: a sustainable, resilient, and equitable world.
